

End-of-Day Billing Reconciliation

Standard Operating Procedure for Front Desk Staff

Overview

The end-of-day reconciliation ensures all payments collected during the day match the transactions recorded in ClinicDesk. This procedure should be completed by the last front desk staff member before closing.

Step 1: Run the Daily Payment Report

Navigate to Reports > Financial > Daily Payment Summary. Set the date to today and click Generate. This report shows all payments received, broken down by payment method (cash, check, credit card, insurance).

Step 2: Count Physical Payments

Count all cash in the drawer and compare to the cash total on the report. List all checks received and verify amounts match. Keep cash and checks in separate envelopes labeled with the date.

Step 3: Verify Credit Card Batches

Go to Billing > Payment Processing > Batch Summary. Compare the batch total to the credit card total on the Daily Payment Summary. If there is a discrepancy, check Billing > Payment Processing > Transaction Log for voided or refunded transactions.

Step 4: Review Outstanding Balances

Run Reports > Financial > Outstanding Balances. Check for any patients seen today who still have an unpaid copay or balance. Flag these for follow-up calls the next business day using the Task Manager: Tasks > New Task > "Payment Follow-up".

Step 5: Submit the Reconciliation

Go to Billing > End of Day > Reconciliation. Enter the counted totals for each payment method. ClinicDesk will automatically flag discrepancies greater than \$1.00. Add notes for any discrepancies (e.g., "Patient Smith paid \$20 cash, receipt printed but not recorded - manually added"). Click Submit.

Step 6: Generate Deposit Slip

After submitting, click "Generate Deposit Slip" to create a bank-ready deposit summary. Print two copies: one for the bank, one for the office file. The deposit slip is also saved under Reports > Financial > Deposit History.

Troubleshooting Common Issues

If the credit card batch does not match: check for pending authorizations that have not settled. If a payment is missing: search by patient name in Billing > Payment History. If ClinicDesk shows a payment that was not collected: create a billing note and escalate to the office manager.
